

AUTOPSY SUMMARY: RESTRICTED ACCESS

Case: IR-04-20-25

Medical Examiner: (redacted)

Date of Examination: 04/21/2025

Findings (clinical summary):

- Primary cause: Extensive craniofacial tissue loss; absence of epidermal and dermal layers in facial region. Bone structures in maxilla/mandible compromised beyond recognition.
- Time of death: Estimated 12-24 hours prior to discovery.
- External injuries show selective destruction, not consistent with standard blunt force trauma. Pattern resembles controlled chemical or thermal exposure.
- No defensive wounds identified; extremities intact, suggesting incapacitation prior to trauma.
- Internal exam notes: [WITHHELD - CLASSIFIED HOLD]

Remarks:

Full autopsy report is classified and withheld under Administrative Hold.
